PROFILE

Full-Stack Software Engineer with 3+ years of experience delivering scalable enterprise web and mobile applications. Specialized in Angular, Spring Boot, and modern JavaScript ecosystems, with growing expertise in DevOps, CI/CD, and cloud-native architectures. Currently advancing applied AI research through PhD studies and elite software engineering training. Proven ability to design and optimize systems end-to-end, reduce deployment errors, and improve performance across production environments.

PROFESSIONAL EXPERIENCE

Sword Group | Beirut, Lebanon

Full-Stack Software Engineer | January 2026 – Present

- Developing and maintaining enterprise-grade web applications using Spring Boot and modern Angular, improving feature delivery speed by ~20%.
- Contributing to EV2PS (Vessel Systems & Maritime Operations Platform) by building scalable, secure backend services handling complex operational workflows.
- Designing and implementing RESTful APIs, reducing frontend-backend integration issues by ~30%.
- Optimizing PostgreSQL queries and database models, improving response time of critical endpoints by ~25%.
- Enhancing system stability through refactoring and architectural improvements, reducing production bugs by ~15%.
- Actively participating in Agile ceremonies, sprint planning, and peer code reviews to ensure high-quality, maintainable code.

IN2 | Beirut, Lebanon (Part-Time / Contract)

Full-Stack Engineer | January 2026 - July 2026

- Maintaining and enhancing Angular & Spring Boot modules, improving overall system reliability by ~20%.
- Fixing production issues and implementing new features, reducing recurring support tickets by ~30%.
- Optimizing backend performance and database queries, improving API efficiency by ~15%.
- Providing technical guidance and mentoring to junior developers, assisting with code reviews and best practices adoption.
- Supporting knowledge transfer and documentation improvements to ensure smoother onboarding and maintainability.

IN2 | Beirut, Lebanon

Full-Stack Engineer | October 2023 - December 2025

- Architecting and delivering end-to-end solutions using Angular (frontend) and Spring Boot (backend).
- Integrated ZKTeco BioTime, BioTimeCloud, BioSecurity & BioAccess, boosting access control and time-tracking efficiency by ~30%, reducing manual interventions.
- Led database migration efforts and implemented Liquibase for schema version control, cutting

deployment errors by 40%.

- Resolved critical bugs using advanced debugging techniques, improving system stability and reducing downtime by 25%.
- Integrated and optimized third-party APIs, enhancing overall performance.
- Collaborated in cross-functional Agile teams, sprint planning, retrospectives, daily stand-ups.
- Participated in code reviews and peer mentoring, ensuring high-quality, maintainable code.
- Maintained thorough documentation of codebase, configs, and API integrations, reducing onboarding time for new developers by ~50%.

Merix | Beirut, Lebanon

Full-Stack Software Engineer | October 2021 - Present

- Delivered 10+ full-stack web and mobile applications for startups and businesses, accelerating product launches and supporting scalability.
- Collaborated directly with clients to define requirements, translating business needs into tailored technical solutions with high client satisfaction and repeat engagements.
- Built scalable systems using Spring Boot, Angular, Flutter, React, and Firebase, supporting applications with hundreds of active users.
- Integrated REST APIs, payment gateways, Firebase Auth, and third-party services. • Deployed applications using Docker, Kubernetes, AWS, and Hostinger.

BEANZ | Abu Dhabi, United Arab Emirates

Remote Software Engineer | July 2023 - October 2023

- Built responsive UIs using React.js, TypeScript, and Tailwind CSS.
- Implemented multilingual support (including Arabic) using React i18n.
- Dockerized applications for consistent cross-environment deployments.
- Collaborated in a remote Agile team using Jira, Bitbucket, and Git.

Codi Tech | Beirut, Lebanon

Full Stack Web Developer | November 2022 - June 2023

- Developed full-stack applications using Laravel, Node.js, Express, MongoDB, and REST APIs.
- Built responsive frontends using React.js and React Native.
- Containerized applications with Docker and maintained LAMP-based Linux servers.
- Designed and tested APIs using Postman, implementing API-driven architectures.
- Administered and maintained server environments using LAMP Stack on Linux.
- Delivered 5+ production-ready applications within tight deadlines.

PROJECTS

- **Quest It** – Freelance service marketplace (Flutter, Firebase, Angular) | January 2023 – September 2025
 - Built a cross-platform mobile app with real-time chat, service booking, and geolocation.
 - Implemented Firebase authentication, database, and push notifications.
 - Developed a supporting website in Angular for promotion and onboarding.
- **TreatYouBatter** – Business management dashboard (Spring Boot, Angular, MySQL) | June 2024 – March 2025
 - Created an admin dashboard for managing transactions, invoices, stock, and notifications.

- Built a secure Spring Boot backend and Angular frontend with role-based access.
- Deployed on Hostinger with optimized MySQL performance and REST APIs.
- **JONCO-MET Portfolio** – Business showcase website (MERN Stack) | February 2023 – March 2023
 - Developed a scalable portfolio site to showcase solar and safety film installations.
 - Implemented responsive design and easy project updates.

CONTINUOUS LEARNING & PROFESSIONAL DEVELOPMENT

Elite Software Engineering Bootcamp

OnRamp Academy & Forward MENA | Dec 2025 – Mar 2026

12-week advanced engineering program simulating an international tech agency environment, focused on modern full-stack architecture, DevOps, AI tools, and Agile delivery.

Capstone Contribution – Talent Pool Module (HR Platform)

- Built interview scheduling system with calendar integration
- Implemented candidate pipeline tracking (Interviewed, Offer Sent, Hired, etc.)
- Developed feedback scoring & reusable question templates
- Designed candidate database with tagging & communication history
- Added automated reminders and follow-ups

Technologies: NestJS, Next.js, Prisma, PostgreSQL, Docker Compose, Zod, Zustand, GitHub Actions (CI/CD), OpenTofu (IaC).

EDUCATION

PhD in Generative AI and Digital Twins | Université de Liège | Liège, Belgium | 2026 - Present

MA in Management Information System | Lebanese University | Beirut, Lebanon | 2022 - 2024

BA in Management Information System | Lebanese University | Beirut, Lebanon | 2019 - 2022

Publications

Generative Artificial Intelligence for Underground Utility Digital Twins | Research Paper | IEEE Access, 2026

Co-authored survey paper from ongoing PhD research, conducted with researchers from the American University of the Middle East and the University of Liège. The paper reviews how Generative AI (GANs, VAEs, diffusion models, LLMs, and multimodal architectures) can address data incompleteness, geometric uncertainty, and semantic fragmentation in Underground Utility Digital Twins, and proposes a task-oriented framework and closed-loop architecture for generative-enhanced digital twins in smart cities.

CERTIFICATES

Google Cloud Fundamentals: Core Infrastructure (Google, 2025)

AWS Certified Cloud Practitioner – Amazon Web Services (2025)

LANGUAGES Native in Arabic; Proficient in English and French; Beginner in German.
